IoT Connectivity - Powering the world with cutting-edge solutions

WHAT IOT CONNECTIVITY SOLUTIONS DOES CELLHIRE OFFER?

Cellhire provides a full range of IoT solutions including IoT eSIMs for fast deployment and flexibility and multi-network SIMs which can connect to the strongest mobile network delivering resilient connectivity.

WHAT ARE THE BENEFITS OF CHOOSING CELLHIRE?

- SIM Management Portal for seamless device management, putting you in control.

- Access to a permenant roaming solution providing data across 700 networks in 200 destinations.

- Security and compliance are core principles of Cellhire's solutions.

- A dedicated customer support team is available to assist with any IoT connectivity needs.

WHY CHOOSE CELLHIRE FOR IOT CONNECTIVITY?

Cellhire offers IoT across a full range of technologies, including 4G, 5G, eUICC and emerging low power networks.

When working with Cellhire you gain access the UK's leading networks, ensuring wide coverage, fast data speeds and reliability.

Cellhire IoT eSIMs offer streamlined device management, reduced operational costs and simplified global connectivity.
